Maksim Privalov

Software Engineer

+381-64-553-44-85, mprivalovs@gmail.com | Novi Sad, Serbia, 21102

Permanent Resident of Serbia, EU visa holder

Education

Physics and Mathematics Lyceum № 393, Saint Petersburg, Russia — Sep 2021

High School

ITMO University, Saint-Petersburg, Russia — Sep 2021 - June 2023

Unfinished Bachelor of Neurotechnologies and Software Engineering

- High Mathematics, Fundamentals of Software Engineering, Database Systems, Operating Systems
- GPA: B+ / A

Faculty of Technical Sciences, University of Novi Sad, Novi Sad, Serbia — Oct 2023 - Now

Unfinished Bachelor of Software Engineering and Information Technologies

(Continuing the Software Engineering degree)

- Parallel Programming, Distributed Systems, Web Development, Machine Learning, etc
- GPA: 9.33 / 10.0

Skills

Languages: Java, Rust, C++, Python, C#, C, JavaScript, TypeScript, Kotlin, Go

Technologies & **frameworks**: Spring, Hibernate, Angular, React, Android (Java), Axum, Docker, AWS, JUnit, Maven/Gradle, Selenium, OOP, Ollama, RAG, OCR, Servlet, Thymeleaf, etc

Tools: Jira, Miro, Github, Obsidian

Methodologies: SOLID, YAGNI, Competitive programming, MVC, Scrum

Databases: PostgreSQL, Oracle, Redis, MongoDB, MySQL, etc

IDE: Intellij IDEA, PyCharm, VS Code, VS, Android Studio, RustRower

OS: Windows, Linux

Source Control: Git

Application server: Tomcat

Professional Experience

Freelance — Remote

Math and Engineering Tutor — Sep 2021 - Sep 2023

- Helped students with exams, projects, and other engineering/math assignments.

Digital Access Logic — Belgrade, Serbia

Software Engineer — Oct 2024 - Feb 2025

- Built a microservice-based ticketing system for multiple clients in the entertainment domain; integrated payments via a bank API broker, with fiscal receipt generation for compliance.
- Technologies: Java, Spring, React, Scrum.

KONTEH — Novi Sad, Serbia

KONTEH 2026 Algorithmic Contest Organizer — Dec 2025 - Mar 2026

- Organized and ran a university-level algorithmic contest, sponsored by **Nordeus**; created problems, prepared test cases, set up the contest platform and defined the contest structure and rules.

Faculty of Technical Sciences, University of Novi Sad — Novi Sad, Serbia

Software Engineer — Feb 2026 - now

- Designed and implemented a multi-tenant architecture with per-request configuration resolution, replacing multiple service instances and reducing memory footprint 7+ times while maintaining performance.
- Technologies: Java, Spring, Microsoft SQL, Postman.

Additional Projects:

- Worked on multiple university projects involving web development, machine learning, cybersecurity and system design. In addition, I developed my own commercial project - *CopyBot*, a Telegram bot for automated cross-posting between social networks, built with Java Spring (Boot, Security, Data), PostgreSQL, Selenium, Docker, Flask, and the Telegram API.
